T19. Colorado is in the process of designing a Universal Preschool Program funded in part by a nicotine tax voters approved in 2020. The program's mission is to provide at least 10 hours a week of high-quality preschool for every 4-year-old in the state. However, total funding for the program may be limited and not able to meet that goal. Knowing this, do you think the program should pay for 10 hours a week for every 4-year-old, regardless of a child's socioeconomic circumstances, or should the program prioritize and provide more than 10 hours for children with certain risk factors, such as those with teen parents or those who have language delays?.....	129

T31. Another ballot measure, if approved by voters, would cap the growth of residential and commercial property valuations to 3% a year. This ballot measure aims to reduce the cost of rising property tax bills due to surging home and commercial property values in Colorado. However, residential, and commercial property taxes are primary funding sources for public schools, special districts (fire, library, recreation), and local governments. An analysis from the non-partisan Director of Research of the Legislative Council estimated the decline in property tax revenue to these entities in the 2023-2024 budget year would be \$1.3 billion. The analysis states the following: "This measure will decrease property taxes for homeowners and nonresidential property owners, increasing the money that households will save or spend.... The measure will also decrease revenue to cities, counties, special districts, and school districts, resulting in lower levels of local government services, including police and fire protection, hospital, transportation, education, and library, among other services." If the election were being held today, would you vote yes and approve this ballot measure or vote no and reject it?	195

This ballot measure aims to reduce the cost of rising property tax bills due to surging home and commercial property values in Colorado. However, residential, and commercial property taxes are primary funding sources for public schools, special districts (fire, library, recreation), and local governments. An analysis from the non-partisan Director of Research of the Legislative Council estimated the decline in property tax revenue to these entities in the 2023-2024 budget year would be \$1.3 billion. The analysis states the following: "This measure will decrease property taxes for homeowners and nonresidential property owners, increasing the money that households will save or spend.... The measure will also decrease revenue to cities, counties, special districts, and school districts, resulting in lower levels of local government services, including police and fire protection, hospital, transportation, education, and library, among other services." If the election were being held today, would you vote yes and approve this ballot measure or vote no and reject it?	199
T31. Another ballot measure, if approved by voters, would cap the growth of residential and commercial property valuations to 3% a year. This ballot measure aims to reduce the cost of rising property tax bills due to surging home and commercial property values in Colorado. However, residential, and commercial property taxes are primary funding sources for public schools, special districts (fire, library, recreation), and local governments. An analysis from the non-partisan Director of Research of the Legislative Council estimated the decline in property tax revenue to these entities in the 2023-2024 budget year would be \$1.3 billion. The analysis states the following: "This measure will decrease property taxes for homeowners and nonresidential property owners, increasing the money that households will save or spend.... The measure will also decrease revenue to cities, counties, special districts, and school districts, resulting in lower levels of local government services, including police and fire protection, hospital, transportation, education, and library, among other services." If the election were being held today, would you vote yes and approve this ballot measure or vote no and reject it?	200

Table 21

T19. Colorado is in the process of designing a Universal Preschool Program funded in part by a nicotine tax voters approved in 2020. The program's mission is to provide at least 10 hours a week of high-quality preschool for every 4-year-old in the state. However, total funding for the program may be limited and not able to meet that goal. Knowing this, do you think the program should pay for 10 hours a week for every 4-year-old, regardless of a child's socioeconomic circumstances, or should the program prioritize and provide more than 10 hours for children with certain risk factors, such as those with teen parents or those who have language delays?

Table 21

T19. Colorado is in the process of designing a Universal Preschool Program funded in part by a nicotine tax voters approved in 2020. The program's mission is to provide at least 10 hours a week of high-quality preschool for every 4-year-old in the state. However, total funding for the program may be limited and not able to meet that goal. Knowing this, do you think the program should pay for 10 hours a week for every 4-year-old, regardless of a child's socioeconomic circumstances, or should the program prioritize and provide more than 10 hours for children with certain risk factors, such as those with teen parents or those who have language delays?

Table 27

T26. Colorado is currently conducting an audit of its school accountability system, which primarily evaluates a school by using standardized student test scores. Under the current system, schools with several years of low performance qualify for extra help from the state. These schools can be closed or converted into charter schools if they do not improve. Knowing this, do you think schools should continue to be judged primarily from standardized student test scores, or should the state develop a broader set of standards and criteria to evaluate a school's performance?

Table 30

T29. More than 100 Colorado school districts have four-day school weeks due to low funding or to make up for low teacher pay. These school districts are primarily in rural areas but also include Brighton 27J and Pueblo 60 (Pueblo City Schools). Knowing this, do you think four-day school weeks provide a lower-quality education for students or are they just a reflection of how local communities want to manage their public education system?

Table 30

T29. More than 100 Colorado school districts have four-day school weeks due to low funding or to make up for low teacher pay. These school districts are primarily in rural areas but also include Brighton 27J and Pueblo 60 (Pueblo City Schools). Knowing this, do you think four-day school weeks provide a lower-quality education for students or are they just a reflection of how local communities want to manage their public education system?

Table 31

Several statewide ballot measures are being considered that would impact public education funding. We will now summarize two of them for you. After reading about each ballot measure, please indicate if you would vote yes and approve it or vote no and reject it.

T30. One ballot measure would direct the state legislature to allocate 0.33% of annual revenue received by the state from individuals, corporations, estate, and trust federal taxable income to the state education fund. This ballot measure would not raise taxes and is estimated to allocate \$983.9 million in the 2023-2024 budget year toward public education. Furthermore, this revenue would not be subject to the TABOR amendment, meaning the state would be able to keep and retain these funds in fiscal years when a TABOR refund is paid to taxpayers. If the election were being held today, would you vote yes and approve this ballot measure or vote no and reject it?

Table 31

Several statewide ballot measures are being considered that would impact public education funding. We will now summarize two of them for you. After reading about each ballot measure, please indicate if you would vote yes and approve it or vote no and reject it.

T30. One ballot measure would direct the state legislature to allocate 0.33% of annual revenue received by the state from individuals, corporations, estate, and trust federal taxable income to the state education fund. This ballot measure would not raise taxes and is estimated to allocate \$983.9 million in the 2023-2024 budget year toward public education. Furthermore, this revenue would not be subject to the TABOR amendment, meaning the state would be able to keep and retain these funds in fiscal years when a TABOR refund is paid to taxpayers. If the election were being held today, would you vote yes and approve this ballot measure or vote no and reject it?

Table 32

T31. Another ballot measure, if approved by voters, would cap the growth of residential and commercial property valuations to 3% a year. This ballot measure aims to reduce the cost of rising property tax bills due to surging home and commercial property values in Colorado. However, residential, and commercial property taxes are primary funding sources for public schools, special districts (fire, library, recreation), and local governments. An analysis from the non-partisan Director of Research of the Legislative Council estimated the decline in property tax revenue to these entities in the 2023-2024 budget year would be \$1.3 billion. The analysis states the following: "This measure will decrease property taxes for homeowners and nonresidential property owners, increasing the money that households will save or spend.... The measure will also decrease revenue to cities, counties, special districts, and school districts, resulting in lower levels of local government services, including police and fire protection, hospital, transportation, education, and library, among other services." If the election were being held today, would you vote yes and approve this ballot measure or vote no and reject it?

Table 32

T31. Another ballot measure, if approved by voters, would cap the growth of residential and commercial property valuations to 3% a year. This ballot measure aims to reduce the cost of rising property tax bills due to surging home and commercial property values in Colorado. However, residential, and commercial property taxes are primary funding sources for public schools, special districts (fire, library, recreation), and local governments. An analysis from the non-partisan Director of Research of the Legislative Council estimated the decline in property tax revenue to these entities in the 2023-2024 budget year would be \$1.3 billion. The analysis states the following: "This measure will decrease property taxes for homeowners and nonresidential property owners, increasing the money that households will save or spend.... The measure will also decrease revenue to cities, counties, special districts, and school districts, resulting in lower levels of local government services, including police and fire protection, hospital, transportation, education, and library, among other services." If the election were being held today, would you vote yes and approve this ballot measure or vote no and reject it?

Colorado Statewide Education Opinion Survey, April 26th thru May 1st, 2022, 882n, +/- 3.3% MoE, Weighted Results

Table 32

T31. Another ballot measure, if approved by voters, would cap the growth of residential and commercial property valuations to 3% a year. This ballot measure aims to reduce the cost of rising property tax bills due to surging home and commercial property values in Colorado. However, residential, and commercial property taxes are primary funding sources for public schools, special districts (fire, library, recreation), and local governments. An analysis from the non-partisan Director of Research of the Legislative Council estimated the decline in property tax revenue to these entities in the 2023-2024 budget year would be \$1.3 billion. The analysis states the following: "This measure will decrease property taxes for homeowners and nonresidential property owners, increasing the money that households will save or spend.... The measure will also decrease revenue to cities, counties, special districts, and school districts, resulting in lower levels of local government services, including police and fire protection, hospital, transportation, education, and library, among other services." If the election were being held today, would you vote yes and approve this ballot measure or vote no and reject it?
